About Me

I am a self-taught front-end developer. I am also a full-time student studying project management, and I dedicate my free time to honing my skills in the deadly arts of web development. Currently, I have a good grasp on HTML, CSS, JavaScript, React, and Git, but I plan to go further and learn more about my craft as a front-end developer. You'll find my current project down below that showcase my current skills.

Experience

Rental and Salary Map

TECHNOLOGIES USED: HTML, CSS, JAVASCRIPT, REACT

- Link: https://ad-w99-rental-and-salary-map.netlify.app/
- API(s) used: Mashvisor, JSearch
- This project lets you search for the median, minimum, and maximum rental price and salary, based on your chosen city or state and job title.

API Quiz App

TECHNOLOGIES USED: HTML, CSS, JAVASCRIPT, REACT

- Link: https://ad-w99-scrimba-quiz-app.netlify.app/
- API(s) used: Open Trivia Database
- This project uses an API to generate five random multiple choice questions. The user can check their answers at the bottom of the questions.

Etch-a-Sketch

TECHNOLOGIES USED: HTML, CSS, JAVASCRIPT

- Link: https://ad-w99.github.io/Project-etch-a-sketch/
- This project recreates the etch-a-sketch for users to enjoy online. The user can resize the grid from 2x2 up to 100x100. The user can also use multiple colors on the etch-a-sketch if they provide a RGB color value. The etch-a-sketch also comes with an erase button for when the user wants to erase parts of the board as well as a clear button that erases the entire board.

Calculator

TECHNOLOGIES USED: HTML, CSS, JAVASCRIPT

- Link: https://ad-w99.github.io/Project-calculator/
- This project allows the user to perform basic calculations i.e. addition, subtraction, multiplication, division
